

D1S1T2 (Smart Health Care)

Venue (Mansar Building)
(Room No: 12LH1013)

Time	Paper Id	Name
11:00 am to 11:15am	34	HybridMorph: Towards usage of synthetic with real data for medical MR images registration
11:15 am to 11: 30 am	39	Glaucoma Detection in Retinal Images via Attention-Based Hybrid Deep Model with Fibonacci-Inspired Ring Features
11:30 am to 11:45 am	47	Whirling Triangle-Based Geometric and Texture Feature Extraction with Attention-Driven Hybrid Models for Multiclass Osteoporosis Classification from Knee X-rays
11:45 am to 12:00 pm	51	Leveraging DeepLabV3+ with Explainable AI for Brain Tumor Segmentation in 2D MRI
12:00 pm to 12:15 pm	66	Impact of Age and Gender on the Accuracy of Computational Model-Based Heart Disease Prediction
12:15 pm to 12:30 am	96	A Secure Collaborative Approach for Autism Spectrum Disorder Detection Using Decentralized Deep Learning
